**Allowable subject matter**

Claims 1, 4-11, 14-21, 24-30 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art neither discloses nor suggests the following limitations, in combination with the remaining elements as disclosed in claims 1, 11, 21:

pipelining or hardware logic to pipeline global analysis computations and index creation, wherein the global analysis computations share intermediate results, wherein the global analysis computations extract properties from a global view of documents in a corpus, and wherein index creation builds the index with results of recent global analysis computations for processing of documents existing at a certain point in time, wherein the intermediate results comprise the output of one of the global analysis computations that is input into another one of the global analysis computations and creating a delta index for documents for which no global analysis computations have been performed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
